Permanent Walk and Canopy

Mobile Walkways, Inc. is a solution minded manufacturer. We provide quick answers for walkway systems of all kinds. Whether you are looking for a **temporary or permanent** solution; walkway or event pad; we can provide a cost effective and practical solution. Our system with it's RHINO-PAN ROOF panel and FIBERGLASS SAFPLANK® pad is designed and built of modular sections to produce a low cost but superior quality structure. This maintenance free structure is easily installed for immediate use. The covered system provides protection from all

weather conditions and can be **installed over an existing concrete walk or our modular pad**. This portable system conforms to the requirements of Florida Building Code 2004, has a Florida Product Approval, and meets **wind load standard ASCE-7-05**. At Mobile Walkways, our design build team takes pride in being responsive to our customers while insuring schedules are met and quality is delivered.

- **Easily "Re-locatable" but is a Solid Permanent Structure** ~ If your relocating classrooms, consider taking the walkway with it. Take advantage of the flexibility.
- **Cost Effective** ~ As beautiful and effective as any system, yet priced competitively with so many more benefits.
- **Rent or Buy** ~ Don't have the revenue but need the safety and protection; RENT IT!
- **Installs in Hours and Ready for Immediate Use** ~ In less time than it takes cement to dry, you can have a complete walkway system ready for immediate use. No forms to be built, no concrete to be poured.
- **No Future Concrete Demolition** ~ Just move our system or put it back in stock.
- **No Gutters to Clean** ~ The "U" shaped roof panel design has a continuous drip line, eliminating concentrations of water and erosion.
- **Turnkey** ~ From the moment you call our design/ build team, you will have a complete customized system with satisfaction guaranteed.
- **Safety** ~ Tired of the weather? Give us a few hour. We'll change it. Stop worrying about pedestrian safety.
